

Time Keeps Moving On

Life goes by so quickly as time keeps moving on.
It doesn't matter who we are when time is gone it's gone.
Sunshine warms the flowers until the day is done.
Time maintains its speed and pays no heed to anyone.

We have the very best in life when we're blessed with loyal friends;
the special ones, the ones we know we'll always see again.
Just as silver raindrops are enriching to the land;
the deeper that our friendships grow, the more we understand;
time keeps moving on and on and on.

The greater pleasures can be found by being one who shares,
the love and inspiration of a friend who's always there;
as we try to make a better world, the task is never done.
Love is the reward of friends, as time keeps moving on.

With power, fame and fortune that are only ours to borrow;
we make a better world today and that will help tomorrow.
With beauty, love and vision that we borrow from the gods;
we circulate, inspire, create, as time keeps moving on.
Time keeps moving on and on and on.
